# MESSAGE FROM THE ORGANIZER

“

EVIS was a unique experience for Nirvana Holding, given that we received more than 3,000 visitors to the first edition. All of which showed a deep interest to the several knowledge sessions that took place in the 3-day event.

EVIS was a huge opportunity and a leap for the economy, as it addressed serious global issues and came up with proposed solutions. It is an absolute honor that we contribute to the UAE economy whenever we get the chance and showcase the thriving environment for such ideas to be achieved.

Alaa Al Ali  
Group CEO  
Nirvana Holding

”

# MESSAGE FROM THE ORGANIZER

The first edition of the Electric Vehicle Innovation was met with incredible success and appreciation, indicating that the region is ready for the inevitable transition towards clean transportation, and is in line with UAE strategy towards a sustainable future. We welcomed over 3000 visitors from 35 different countries in the span of 3 days, and hosted the conference, open tech sessions and exhibition which helped accelerate MENA's transition to e-mobility and carbon neutrality. We would like to thank our Sustainability partner Masdar, sponsors, partners, exhibitors, and speakers who worked together and made EVIS' inaugural edition a success.

Eng. Naser Al Bahri  
Managing Director  
Exhibitions & Events Nirvana Holding

# ACCELERATING THE TRANSITION TO E-MOBILITY

Inaugurated by H.E. Suhail Al Mazrouei, Minister of Energy and Infrastructure, and organized by Nirvana Holding with Masdar acting as our Sustainability Partner, the Electric Vehicle Innovation Summit took place from 23rd to 25th May, 2022 at ADNEC, Abu Dhabi convening the EV industry.

EVIS 2022 brought together researchers, engineers, governments, companies, related institutions from around the world to explore and discuss the technical, policy, and market achievements in e-mobility, allowing attendees to network across the value chains and exploit new opportunities at the intersection of EV technologies.

# EXHIBITION OVERVIEW

- EVIS 2022 provided a world-class environment for the EV industry to showcase the latest solutions in front of an audience who matters, including financiers and investors, engineers, R&D & government officials.
- More than 3,000 professionals representing leading companies in the EV industry came together in Abu Dhabi with the goal of networking and sourcing the latest technologies across the 3 days of the exhibition.
- 23 new cars were displayed at EVIS for the first time in MENA, assuring the steady steps the UAE is taking towards sustainable transportation.

# EXHIBITOR FEEDBACK

Of exhibitors were satisfied with the overall quality of the attendees.

Are planning to exhibit again in next edition.

Were satisfied with the leads generated through the event.

CITYTRANSFORMER

# EXHIBITOR FEEDBACK

Majority of the exhibitors stated that they received the following benefits: exposure, networking, better understanding of the competition and market feedback, product evaluation, reviews and product expansion.

We greatly appreciate what have been done at EVIS on all levels. Bringing together all the stakeholders, experts, manufacturers, and regulation experts has generated a great opportunity for us and other participants to get an exposure on the latest trends and innovations in the industry.

Abilash ET Nair

Head of MENA Mobility at Al Naboodah

EVIS was very critical for our marketing and rollout plans, as it gave us the opportunity to exhibit within the capital and really drive traction to our products and services. We are glad to have been part of it and look forward to next year!

Salman Hussain

CEO of FUSE

FUSE

It's our pleasure and honor to come from Oman and be part of EVIS. We got massive feedback, a lot of business leads, and expansion plans. We wish EVIS team all the best in their upcoming events and looking forward to witness massive growth in the electric cars market in the near future.

Adeel Irshad

Chief Operating Officer of EV Technologies

It was a really interesting and well-organized experience, especially that it made us understand not only Abu Dhabi, but also the GCC area, throughout the deep talks with different stakeholders. These talks draw a great picture about the potentials of the region that we will discuss with our associations.

Andre Kaufung  
Managing Director at Charin

# VISITOR OVERVIEW

The Electric Vehicle Innovation Summit 2022 attracted 3,264 attendees from 34 countries who came together to discover the latest technologies and solutions on display, network and do business with the market-leading exhibiting companies and learn from global experts who are shaping the future of e-mobility.

## VISITOR FEEDBACK

“

It's a great opportunity to be here in Abu Dhabi at the First Electric Vehicle Innovation Summit - it's a place to be connecting with others and also to learn about this region which is unknown for us, meeting a lot of people, discovering new topics, and contribute on the network. The whole world is changing .... with the key factor of decarbonizing transport and it's not only happening in Abu Dhabi, it's all happening all over. This is of course important because pollution doesn't have any borders, so we want also to know what's the highlights for this session over here. The strong point for AVERE also is to make the connections and connections we make all over the world and this is what we do here at EVIS.

Philippe Vangeel

”

Secretary-General, AVERE

It's great to be here and see the excitement, to see all the new vehicles that are coming including some made right here in the UAE. But to see Abu Dhabi and this region come together electrification of the fleet, cleaning up the carbon emissions from our surface transportation is really important to us. At Masdar, we've been pioneering in terms of transportation since 2008. We've had the first electric vehicles in the country, we've had PRT, we've had Tesla, we've had NAVIA. and it's great to see the new service offerings that are coming out in this region. We've done a great job at bringing in renewable energy, we've done a good job of bringing in sustainability and really implementing Estidama standards, and now it's time to take on surface transportation. And this Electric Vehicle Innovation Summit is all about that - how do we take the carbon out of surface transportation? So many examples of what's going on here- from the manufacturers to the charging infrastructure, to the regulatory environment, and that's why Masdar is excited to be here as the Sustainability Partner.

Stephen Severance

Head of Programme Management and Investments  
at Masdar City

EVIS is the first time I think that the whole EV ecosystem is getting together in the Middle East. It's fantastic for bp to be part of this event because it helps us get to know some of the movers and shakers who are already starting to make a difference in the Middle East with respect to growing and building the e-mobility ecosystem here. So, for the Middle East and North Africa, what we see in other regions is that until and unless the ecosystem comes together and figure out how to collaborate, it is very difficult for any one company, or any one industry to really develop the e-mobility ecosystem. And so, coming together in events like this is very important because it encourages us to work together more for the betterment of our customers who are all looking for cleaner ways of travel. EVIS is an event which enables bp to be able to reach a large number of ecosystem players and people in the industry, and it enables us to be able to start conversations and also look at new opportunities to invest to help the e-mobility ecosystem grow - and grow very strongly here.

Sophia Nadur

Managing Partner at bp Ventures

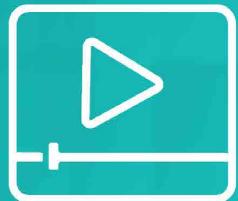

# MARKETING & COMMUNICATIONS

The Electric Vehicle Innovation Summit conducted a highly targeted and effective 360-degree marketing and communications campaign to create and enhance pre, during and post-show exposure.

Across the 3 days, EVIS2022 engaged national and international media to cover and engage in discussions relevant to the e-mobility industry. They covered important discussions that were highlighted at the event and interviewed key spokespeople who participated in EVIS, achieving more than 50 million in local & international reach.

The countdown for the first 'Made in UAE' electric car has begun. And Dr Majida Alzahrani, chairwoman of M Glory Holding Group, is super excited for the big day.

الإمارات | عربية ودولية | اقتصادي | ابراسي | فاررون | مدونات | الجمادات | اكتئاب | اسبي | الصناعة | اخبار الاعمال |

سيد الحجار (أبوظبي)

تعتمد وكالات سيارات في الإمارات التوسع في إطلاق المزيد من السيارات الكهربائية بالسوق المحلي، خلال العام الحالي، تلبية للطلب المتزايد على السيارات الكهربائية بالدولة، فضلاً عن التوسع في إنشاء محطات الشحن.

وقال هؤلاء لـ«الاتحاد»، على هامش مشاركتهم في الدورة الأولى من قمة (EVIS) للابتكار في المركبات الكهربائية بأبوظبي، التي افتتحها، أمس، سهيل المزروعي، وزير الطاقة والبنية التحتية، وتستمر لمدة ثلاثة أيام في مركز أبوظبي الوطني للمعارض، إن الفترة المقبلة ستشهد المزيد من الازدهار في سوق المركبات الكهربائية في الإمارات، بما ينبع عن خطط الدولة لخفض الانبعاثات، والمبادرة الاستراتيجية لدولة الإمارات لتحقيق الحياد المناخي بحلول 2050.

وأعد قمة EVIS للابتكار في المركبات الكهربائية بأبوظبي، الأولى من نوعها في منطقة الشرق الأوسط وشمال أفريقيا، وتنظمها شركة نيرفانا القابضة بدعم من مركز أبوظبي الوطني للمعارض، ومجلس صناعات الطاقة النظيفة، بحضور الشركات المتخصصة في قطاع المركبات الكهربائية والصناعات التكميلية.

وتعرض القمة الحلول المقترنة والمحدّمة للنقل، وجعله أكثر أماناً للبيئة، سواء كانت حلوأً تتعلق بالبنية التحتية أو اللوائح

A screenshot of the Abu Dhabi Sustainability Week website. The top navigation bar includes links for English, Arabic, and French, along with sections for Events, News, About Us, and Contact. A banner at the top right features the Abu Dhabi Sustainability Week logo. Below the banner, a red button reads "أدخل عنوانك" (Enter your address). The main content area shows a photograph of a panel discussion on stage. Five people are seated on white chairs, facing an audience. The stage is illuminated with blue lights, and the background features large letters spelling out "EVIS". Below the photo, text reads "ELECTRIC VEHICLE INNOVATION SUMMIT". To the left of the photo, there's a sidebar with a search bar, a "آخر شفط" (Latest) dropdown menu, and a "اختر شعار" (Select Logo) section featuring the CAN logo. At the bottom left, there's a small logo for the Abu Dhabi Sustainability Week.

**البنك الدولي يرفع توقعاته لنمو اقتصاد الإمارات**

**أبوظبي (الاتحاد)** توقع البنك الدولي المسار المنشئ للارتفاع في النمو الاقتصادي في الإمارات إلى 3.9% في 2022، مع التأكيد على استمرار هذه التوقعات على الرغم من التحديات التي تواجهها إقتصادياً، بما في ذلك التغير المناخي والتحديات التي تحيط بـ"أوبك بلس". ويشير报 إلى أن التقديرات تأتي في وقت يشهد فيه انتعاش اقتصاد العالم، حيث يتعافى العالم من آثار جائحة كورونا، بينما يتعافى الاقتصاد العالمي من آثار جائحة كورونا. ويشير到 إلى أن التقديرات تأتي في وقت يشهد فيه انتعاش اقتصاد العالم، حيث يتعافى العالم من آثار جائحة كورونا، بينما يتعافى الاقتصاد العالمي من آثار جائحة كورونا.
